

## Wireless PowerG Outdoor Siren **PG4911**

(Applicable to Brazil, Peru, Uruguay,  
Asia Pacific excluding China)

### Features That Make a Difference:

- **PowerG\*** robust, industry leading commercial grade wireless technology
- Sleek design and robust weatherproof housing (IP55)
- 110dB Siren with strobe light
- Long-life lithium batteries (sold separately)
- Compatible with PowerSeries Neo systems

### The power of PowerG\*:

The power behind our latest products lies in various innovative technologies, including the revolutionary PowerG, which, bundled together, provide a robust and feature-rich platform designed to reduce operational costs for dealers and provide ultimate reliability for end users.

- Multichannel, Frequency Hopping Spread Spectrum technology - to overcome frequency blocking and interference
- Adaptive Transmission Power - for battery life preservation
- High transmission ranges - for reliable communication within up to 2km/2187 yards line-of-sight
- TDMA synchronized communication technology - to prevent message collisions
- 128 bit AES encryption - high level protection against analysis tools and digital attacks

### PG4911 Wireless PowerG Outdoor Siren

The PG4911 is a fully supervised Wireless PowerG Outdoor Siren, designed for installation in areas in which wiring is difficult or impossible. The PG4911 is a self-powered wireless outdoor siren that provides the perfect security solution for home owners looking for an external siren that is both affordable and easy to install. The PG4911 combines form and function to provide improved protection against intruders, before they get the chance to enter the home.

### Easy to Install | Signal Quality Indication

Since the PG4911 is wireless, it can conveniently be installed in numerous locations outside the home. With fewer holes to drill and reduced installation time, an installer can quickly move on to another installation.

The PG4911 Wireless PowerG Outdoor Siren is equipped with a visible signal quality LED indicator that lets the installer choose the optimal location for installation, eliminating the effort of going back and forth to the keypad. Additionally, device configuration is quick and easy with no hardware switches or need to re-open devices. All device configuration settings are handled on the keypad with no need to re-open the device once installed.

Differentiated audible and visual alerts are emitted in the case of Fire, Carbon Monoxide, Burglary and Flood events, ensuring that no alert goes unnoticed. In addition to providing a loud audible alert, the PG4911 also contains a built-in high-power strobe light providing a visual alert of the event.

From Tyco Security Products

## Weather-Proof Design

The PG4911 provides an Ingress Protection (IP) of IP55. An Ingress Protection Rating provides information on how well the siren is equipped to withstand the elements that it is exposed to. A rating of IP55 in particular ensures the unimpaired functionality of the PG4911 PowerG wireless outdoor siren in the presence of dust and water jets.

## Specifications:

Dimensions:.... 295 x 186 x63mm (11.63 x 7.31 x 2.5 in.)  
Battery Life: .....up to 8 years (typical use)  
Battery Type: .....3.6V, Li-Thionyl Chloride 0-102710  
Weight (including battery): .....970 gr (34 oz)  
Operating Temperature: .....-33°C to 70°C  
(-27.4°F to 158°F)

## Approvals:

FCC/IC, UL/ULC, CE, C-Tick, ANATEL, WPC, IDA  
Please refer to [www.dsc.com](http://www.dsc.com) for the most current approval listings.  
Product varies depending on country.

## Compatibility:

PowerSeries Neo and iotega systems
